

bachelor program

transformation studies. art x science

Degree: Bachelor of Arts (BA)
Duration: 6 semesters
Credits: 180 ECTS
Language: English (B2, CEFR)

Johannes Kepler University Linz and the **University of Applied Arts Vienna** are jointly offering a bachelor's degree in **Transformation Studies. Art x Science**, combining the strengths and competencies of both universities.

The new study program offers a unique blend of artistic and scientific methods and approaches. Its main objective is to situate current transformation dynamics in their historical context and to imagine possible alternatives.

The degree program qualifies students to work in complex transformative projects and processes. It prepares students to take on roles such as initiator, coordinator, moderator, mediator or facilitator in an interdisciplinary team. Graduates are qualified to work in different areas (public institutions, the academic sector, the private sector...) and to accompany, design and implement projects with different participants/stakeholders.

Studying at two universities

Studying at two universities offers a diverse range of content and specialization options. It allows students to experience two different cities and cultures of learning.
